

ARJUN A

SOC Analyst | Threat Detection Engineer | Cybersecurity Specialist

Phone: +91 89434 57503 | E-mail: arjunarumughan02@gmail.com | GitHub: <https://github.com/arjunarju123> |
LinkedIn: <https://www.linkedin.com/in/arjun-a-454b85256> | Kerala, India

PROFESSIONAL SUMMARY

CEH-certified Associate SOC Analyst with hands-on experience in security alert triage, SIEM management, incident response and vulnerability assessment. Proficient in Wazuh SIEM, Sysmon, MITRE ATT&CK framework and endpoint detection and response (EDR). Experienced in executing SOC runbooks, configuring detection rules, automating security workflows and supporting root cause analysis. Built two independent security operations projects documented on GitHub. Holds Certified Ethical Hacker (CEH) certification. Seeking an entry-level SOC Analyst or Cybersecurity Specialist role; open to relocation and remote opportunities.

TECHNICAL SKILLS

SIEM and Monitoring: Wazuh, Splunk, Microsoft Sentinel, Log Monitoring and Correlation, Security Alert Triage, Detection Engineering

Incident Response: Alert Triage, Runbook Execution, Incident Escalation, Root Cause Analysis, MITRE ATT&CK Mapping, Threat Hunting

Endpoint Security: Sysmon, File Integrity Monitoring (FIM), EDR and XDR Concepts, Active Response, Endpoint Agent Management

Vulnerability Assessment: OpenVAS, Nessus, Nmap, CVSS Scoring, CVE Identification, Remediation Verification, Risk Pattern Analysis

Security Tools: IDS and IPS, WAF Concepts, DLP Concepts, Wireshark, Firewall Management, Burp Suite, Metasploit, SOAR Concepts

Compliance and Governance: OpenSCAP, CIS Benchmarks, Security Posture Reporting, Incident Documentation

Cloud Security: Microsoft Azure, Microsoft Sentinel, Identity and Access Management (IAM), Cloud Security Concepts

Scripting and Automation: Bash Scripting, Security Workflow Automation, SOAR Concepts, SOC Process Improvement

Web Application Security: OWASP Top 10, SQL Injection, Cross-Site Scripting (XSS), Penetration Testing, VAPT

Systems and Network: Windows Server 2016, Active Directory, Ubuntu Linux, TCP/IP, DNS, DHCP, OSI Model, VPN

PROFESSIONAL EXPERIENCE

Security Admin Associate L1 (Internship)

Jan 2026 – Mar 2026

Infotact Solutions | Kerala, India

- Deployed and managed Wazuh SIEM Manager with endpoint agents across Linux and Windows servers, enabling centralized enterprise security monitoring
- Implemented File Integrity Monitoring (FIM) policies to detect unauthorized changes in critical system files and security sensitive directories
- Integrated Sysmon telemetry to enhance endpoint visibility across process creation, persistence mechanisms, and lateral movement indicators
- Configured automated Active Response workflows to dynamically block brute-force attacker IPs using host firewall enforcement
- Performed proactive threat hunting using SIEM correlation rules and endpoint telemetry; mapped findings to MITRE ATT&CK techniques
- Simulated ransomware attack techniques (MITRE T1490 – Shadow Copy Deletion) using AtomicRedTeam to validate detection coverage
- Conducted authenticated and unauthenticated vulnerability assessments using OpenVAS; identified critical CVEs and prioritised remediation
- Executed CIS Benchmark compliance validation using OpenSCAP and produced structured security posture reports

Enterprise SOC Monitoring Lab - Wazuh SIEM, EDR and Threat Simulation

GitHub: <https://github.com/arjunarju123/Security-Operations-SOC---Enterprise-EDR-Threat-Hunting-Grid>

- Deployed Wazuh SIEM on Kali Linux with Windows Server and Ubuntu agents; integrated Sysmon for process-level endpoint telemetry providing full SOC monitoring stack
- Developed custom SIEM detection rules mapped to MITRE ATT&CK techniques; configured Active Response to automatically block SSH brute-force attempts in real time
- Simulated ransomware behaviour using Atomic Red Team (MITRE T1490); validated detection coverage and automated alert generation to reduce manual monitoring effort
- Implemented File Integrity Monitoring (FIM) with real-time alert generation and CVE-based vulnerability detection across monitored endpoints

VulnVision 360 - Continuous Compliance and Threat Exposure Engine

GitHub: <https://github.com/arjunarju123/Vulnvision-360>

- Built automated asset discovery using aggressive Nmap subnet scanning to maintain a continuously updated internal attack-surface inventory
- Conducted authenticated and unauthenticated vulnerability assessments using OpenVAS (GVM); identified critical CVEs with CVSS scores above 9.0 and implemented remediation verification workflow
- Automated CIS Benchmark compliance validation using OpenSCAP; generated executive risk reports highlighting top 10 critical fixes for stakeholder review

Windows Server 2016 Domain Environment Lab

- Built complete Windows Server 2016 domain environment using Oracle VirtualBox; configured Active Directory Domain Services, DNS, and DHCP for centralized network administration
- Implemented user, group, and policy management through Group Policy Objects; demonstrated end-to-end knowledge of enterprise network setup and administration

CERTIFICATIONS

Certified Ethical Hacker (CEH) - EC-Council

Advanced Diploma in Cyber Defence - RedTeam Hacker Academy

EDUCATION

BA English Literature - University of Calicut, Kerala, India

2020 – 2023

Transitioned into cybersecurity through structured industry training, professional certifications, and hands-on lab practice demonstrating self-driven technical capability.

AWARDS

Rajya Puraskar - Awarded by the Governor of Kerala for excellence across multiple achievement areas
