PROFESSIONAL SUMMARY

CEH-certified cybersecurity professional with internship and hands-on experience in SIEM monitoring, incident response, vulnerability assessment and threat hunting. I have worked with Splunk and Wazuh SIEM, Sysmon, MITRE ATT&CK, OpenVAS, OpenSCAP, Nmap and Windows Server administration.

TECHNICAL SKILLS

SIEM & Threat Detection: Wazuh SIEM, Microsoft Sentinel, Splunk, Log Monitoring & Correlation, Security Alert Triage, Event Log Analysis, Incident Escalation, Incident Response, MITRE ATT&CK, Threat Hunting, Malware Analysis, Security Event Monitoring, Root Cause Analysis, IOC Analysis, Endpoint Detection, Playbooks, Windows Event Logs.

VAPT & Web Application Security: OpenVAS (GVM), Nessus, Nmap, CVSS Scoring, CVE Triage, Vulnerability Validation, Remediation, Verification, OWASP Top 10, Burp Suite, Metasploit, SQL Injection, Cross-Site Scripting (XSS), Web Vulnerability Assessment, Authentication & Session Testing

Cloud Security: Microsoft Azure (Cloud Administration & Security), Microsoft Sentinel (Cloud SIEM), Cloud Computing Concepts, Identity & Access Management (IAM)

Network Security: TCP/IP, DNS, OSI Model, Network Traffic Analysis, IDS/IPS, Network Segmentation, Routing & Switching Fundamentals, Firewall Fundamentals, VPN, DHCP

Systems & Administration: Windows Server 2016, Active Directory, Group Policy, User & Group Management, Ubuntu Linux, Kali Linux, Oracle VirtualBox

Security & Additional Skills: OSINT, Reconnaissance, Phishing Simulations, Encryption & Decryption, OpenSCAP, Problem Solving, Time Management.

EXPERIENCE & PROJECTS

Security Admin Associate L1 (Internship), Infotact Solutions

01/2026 – 03/2026

- Deployed Wazuh SIEM across Windows Server and Ubuntu endpoints to centralize security monitoring.
- Developed custom detection rules mapped to MITRE ATT&CK techniques. ✕ Investigated security alerts and validated ransomware detection using Atomic Red Team.
- Conducted authenticated vulnerability assessments using OpenVAS and prioritized remediation based on CVSS severity
- Configured Active Response to automatically block SSH brute-force attacks.

Enterprise SOC Monitoring Lab,

<https://github.com/arjunarju123/Security-Operations-SOC---Enterprise-EDR-Threat-Hunting-Grid> 🔗

- Deployed Wazuh SIEM to monitor Windows Server and Ubuntu endpoints.
- Integrated Sysmon to improve visibility into process creation, persistence and privilege escalation events.
- Across monitored endpoints, FIM was implemented with real-time alerts and CVE-based vulnerability detection.
- Created custom detection rules and mapped them to MITRE ATT&CK techniques.
- Set up Active Response to prevent brute-force SSH attacks automatically.
- Used Atomic Red Team to simulate ransomware behavior (MITRE T1490) and verify detection using alerts.

VulnVision 360, <https://github.com/arjunarju123/VulnVision-360> 🔗

- Automated network asset discovery using Nmap.
- Performed authenticated and unauthenticated vulnerability assessments using OpenVAS, prioritized vulnerabilities based on CVSS severity, and verified remediation.
- Used OpenSCAP to conduct CIS Benchmark compliance evaluations
- Prepared security reports summarizing identified risks, affected assets, and remediation recommendations

Server Administration, Windows Server 2016 Domain Environment

- Deployed a complete Active Directory domain environment in Oracle VirtualBox.
- Configured DNS, DHCP, and Active Directory Domain Services.
- Created users, groups and organizational units.
- Implemented Group Policy Objects (GPOs) for centralized administration.
- Demonstrated hands-on knowledge of virtualization, server administration, and enterprise network setup.

EDUCATION

Bachelor of Arts (BA) English Language and Literature, University of Calicut

2020 – 2023

CERTIFICATIONS

Certified Ethical Hacker (CEH) – EC-Council

Advanced Diploma in Cyber Defence – RedTeam Hacker Academy
