## Summary

Cybersecurity professional with combined training and hands-on experience in SOC Operations, Network Security, Vulnerability Assessment, Penetration Testing and Server Administration. Skilled in log monitoring, security event analysis, incident response and identifying vulnerabilities in web and network environments. Proficient in Nmap, Wireshark, Burp Suite, Metasploit, Splunk and Windows Server and Active Directory.

## Technical Skills

- **Penetration Testing & Vulnerability Scanning:**  
Nmap, Burp Suite, Metasploit.
- **Network Security, Incident Response & Wireshark Packet Analysis:** Wireshark, Splunk, Wazuh, Firewall Management, TCP, IDS/IPS, Log Correlation.
- **Cybersecurity Fundamentals & Server Administration:**  
Threat Intelligence, Vulnerability Analysis, Windows Server, Active Directory.
- **Social Engineering & OSINT:**  
Reconnaissance, Phishing Simulations, Information Gathering.
- **Cryptography & Data Protection:**  
Encryption, Decryption, Key Management.
- **Security Tools:**  
Splunk, Kali Linux, Wireshark, Burp Suite, Nmap, Metasploit, Hydra.

## Certifications

- **Certified Ethical Hacker** – EC-Council
- **Advanced Diploma in Cyber Defence** – RedTeam Hacker Academy.  
Modules: Penetration Testing, Network Security, OSINT, Incident Response, Cryptography, Threat Intelligence & Hunting, Red Team Exercises, Web and Network Exploitation, and more.
- **Introduction to Dark Web, Anonymity, and Cryptocurrency** – EC-Council
- **Cisco LABS Crash Course** – EC-Council

## Projects

### Wazuh SIEM Deployment & Log Monitoring Project

- Set up the Wazuh SIEM platform on Kali Linux and learned both manual and automated installation methods to understand the full architecture more clearly.
- Connected Windows and Linux machines as agents and monitored their activity in real time including Log review, Monitoring, Alert triage, and File-integrity changes.
- Explored the Wazuh dashboard to analyse security events, understand alert patterns, and improve my practical skills in Endpoint monitoring, Threat detection and Incident documentation.

### Server Administration – Windows Server 2016 Domain Environment

- Built a complete Windows Server 2016 domain environment using Oracle VirtualBox, covering installation, configuration and management of virtual machines
- Installed and configured Active Directory Domain Services, DNS and DHCP to enable centralized network administration.
- Created and joined Windows 10 clients to the domain, implementing user, group and policy management through the server.
- Demonstrated end-to-end knowledge of virtualization, server configuration and enterprise network setup.

## Practical Experience

### RedTeam Hacker Academy

- Gaining hands-on experience in Penetration testing, Vulnerability Assessment, and Redteam exercises.
- Conducting Network and Web Application Security Assessments, Identifying Vulnerabilities, and Proposing solutions.
- Using tools like Nmap, Metasploit, Burp Suite, OSINT and Wireshark to conduct security tests.

## Awards

- **Rajya Puraskar** – Governor of Kerala (Recognized for excellence in various areas of contribution).

## Education

### University of Calicut

BA English Literature | 2020 - 2023
